SUMMARY

CS student specializing in predictive modeling and financial time-series analysis, with practical experience applying ARIMA and linear regression to evaluate out-of-sample signals across equity datasets. Built reproducible Python pipelines with rolling validation and deployed findings to production as a full-stack research platform. Seeking data engineering or quant roles where modeling depth and software rigor both matter.

EDUCATION

Georgia State University

Atlanta, GA

B.S. Computer Science, GPA: 3.2 | GSU Honors College

Aug. 2023 – May 2026

Coursework: Data Structures, Algorithms, Software Engineering, Probability & Statistics, Data Science

Certifications: MTA: Introduction to Programming Using Java (May 2022) | MTA: Software Development Fundamentals (Apr. 2022)

EXPERIENCE

Office Assistant and Intern

Oct. 2023 – Present

Fortune Acres Real Estate

Alpharetta, GA

- Tracked and analyzed social media engagement metrics across platforms, identifying content trends that drove a 20%+ increase in brand visibility and client reach
- Built and maintained internal data tracking systems for 50+ active client records, improving operational reporting accuracy and reducing lookup time

Web Developer Consultant

Apr. 2025 – Aug. 2025

NGAO Security LLC

Atlanta, GA

- Rebuilt company website using HTML, CSS, and JavaScript, streamlining service request workflows and reducing update turnaround time by 40%
- Led stakeholder requirement sessions to define design specs and optimize site structure for SEO, increasing organic traffic and client lead generation by 30%

PROJECTS

CorrLabX | *Python, React, Node.js, Express, Pandas, statsmodels, Railway, Vercel*

github.com/2u5hi/CorrLabX

- Built a full-stack quantitative research platform integrating a Python analysis engine with a React frontend via REST API for interactive exploration of financial time-series data across 10+ equity pairs
- Implemented ARIMA and linear regression models with rolling validation; developed a composite signal scoring system to rank equities by statistical strength and deployed live to Vercel

Financial Time-Series Analysis | *Python, Pandas, statsmodels, ARIMA, Jupyter* github.com/2u5hi/financial-time-series-analysis

- Built a standalone pipeline to identify spurious correlations and evaluate predictive signals across equity datasets using ARIMA with rolling validation, structured as a reproducible research notebook
- Findings directly motivated the architecture of CorrLabX; analysis emphasized out-of-sample rigor to avoid look-ahead bias in signal evaluation

Daikibo Telemetry & Pay Equity Analysis | *Tableau, Python, Excel* | Deloitte Data Analyst Forage

- Analyzed factory telemetry across 4 global facilities; built interactive Tableau dashboard with downtime breakdowns by factory and device type, identifying highest-downtime site and most failure-prone device
- Classified gender pay equity across employee records in Excel using a conditional scoring formula, flagging compensation gaps as Fair, Unfair, or Highly Discriminative based on deviation thresholds

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, Java, HTML, CSS

Data & Quant: Pandas, statsmodels, ARIMA, Time Series Analysis, scikit-learn, Excel, Tableau, Jupyter

Frameworks & Tools: React, Angular, Node.js, Express, Git, GitHub, MySQL, Vercel, Railway, VS Code

LEADERSHIP

Head of Alumni Relations, Health & Safety Rep., VP Committee – Alpha Tau Omega, Eta Beta Chapter, GSU (Aug. 2023 – May 2023); organized 10+ events per semester, managed schedules for 50+ members

Secretary & Social Media Supervisor – Société Honoraire de Français, Founding Member (Aug. 2021 – May 2023); co-founded chapter, managed communications for 30+ members, raised \$200+ for Haiti Foundation
