EDUCATION

Georgia State University

B.S. Computer Science | GSU Honors College

Atlanta, GA

Aug. 2023 – May 2026

EXPERIENCE

Web Developer Consultant

NGAO Security LLC

Apr. 2025 – Aug. 2025

Atlanta, GA

- Rebuilt company website using HTML, CSS, and JavaScript following Agile practices, streamlining service request workflows and reducing update turnaround time by 40%
- Led stakeholder requirement sessions and restructured site architecture for SEO, increasing organic search visibility by 30% and driving measurable growth in client lead generation

PROJECTS

Midas Core | *Java, Spring Boot, Apache Kafka, Spring Data JPA, H2, REST* | JPMorgan Chase Advanced SE Forage

- Built a financial transaction processing service consuming real-time Kafka events, validating accounts and balances, and persisting records to an H2 database via Spring Data JPA
- Introduced atomic transaction management via Spring `@Transactional`, ensuring 100% consistency of sender/recipient balance updates and eliminating partial-write failures under concurrent load
- Integrated an external Incentive REST API using RestTemplate to apply dynamic incentive amounts post-validation, decoupling incentive logic from core processing

Daikibo Telemetry & Pay Equity Analysis | *Tableau, Excel* | Deloitte Data Analyst Experience Forage

- Analyzed factory telemetry across 4 global Daikibo facilities; built interactive Tableau dashboard with downtime breakdowns by factory and device type, identifying Osaka as highest-downtime site and LaserWelder as most failure-prone device
- Classified gender pay equity across employee records in Excel using a conditional scoring formula, flagging compensation gaps as Fair, Unfair, or Highly Discriminative based on deviation thresholds

CorrLabX | *Python, React, Node.js, Express, Pandas, statsmodels, Railway, Vercel*

github.com/2u5hi/CorrLabX

- Built and deployed a full-stack quantitative research platform with a React frontend on Vercel and a Python/Node.js backend on Railway, supporting live financial analysis across 10+ equity pairs
- Implemented ARIMA and linear regression models with rolling validation; integrated Alpha Vantage API for real-time data ingestion with rate limiting and input validation for production reliability

TravelMS | *Angular, TypeScript, Node.js, Express, MySQL, Vercel*

github.com/2u5hi/TravelMS

- Designed and deployed a full-stack travel management system with a normalized MySQL schema across 5+ entity types, reducing redundant data and enforcing referential integrity across all relationships
- Built a responsive Angular/TypeScript frontend with dynamic route-based views and integrated RESTful endpoints for real-time data binding across all entity types

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL, HTML, CSS

Frameworks & Libraries: React, Angular, Node.js, Express, Pandas, statsmodels, Spring Boot, Spring Data JPA, Spring Kafka

Developer Tools: Git, GitHub, MySQL, Vercel, Railway, VS Code, Apache Kafka, H2, Tableau

LEADERSHIP

Head of Alumni Relations, Health & Safety Rep., VP Committee – Alpha Tau Omega, Eta Beta Chapter, Georgia State University (Aug. 2023 – May 2026); organized 10+ events per semester and managed schedules for 50+ members
